

July 26-31, 2015

Training Institute for
Dissemination and
Implementation
Research in Health

Pasadena, California

TIDIRH 2015 ANNOUNCEMENT

Applications now being accepted through April 10, 2015

One of the most critical issues impeding improvements in public health today is the enormous gap between what we know can optimize health and healthcare and what actually gets implemented in every day practice. The science of dissemination and implementation (D&I) seeks to address this gap by understanding how to best ensure that evidence-based strategies to improve health and prevent disease are effectively delivered in clinical and public health practice.

Institute Goals

Kaiser Permanente and the Cancer Research Network, with support from the National Institutes of Health (National Cancer Institute, National Institute of Diabetes and Digestive and Kidney Diseases, National Heart, Lung, and Blood Institute, and the Office of Behavioral and Social Sciences Research) and the U.S. Department of Veterans Affairs is hosting this 5-day training institute to provide participants with a thorough grounding in conducting dissemination and implementation research in health across all areas of health and healthcare. Faculty and guest lecturers will consist of leading experts (practitioners and teachers) in theory, implementation and evaluation approaches to D&I, creating partnerships and multi-level, transdisciplinary research teams, research design, methods and analyses appropriate for D&I investigations and conducting research at different and multiple levels of interventions (e.g., clinical, community, policy). The training is open to researchers with interests in studying D&I across health care, public health and community settings.

Participant Eligibility Requirements

This training is designed for investigators at any career stage interested in conducting Dissemination and Implementation (D&I) research. To be eligible, participants must NOT have current R18, R01 or R01-equivalent funding as a principal investigator for D&I research or received such funding in the in the past five year(s). Note: investigators who have received an R01 or equivalent are eligible, as long as the funding was not specifically for D&I research. Preference will be given to applicants who demonstrate experience with, or potential for, working effectively in transdisciplinary teams and who have strong partnerships with—or are embedded within—healthcare delivery, public health or community-based networks. We seek a balance of both junior and senior investigators, with the overall goal of bringing new people into the field of D&I research. While we anticipate most participants will be early to mid-career individuals, we will enroll a limited number of senior researchers who are making the switch to D&I research.

In addition, to be eligible, participants must meet all of the following criteria:

- Hold a doctoral degree (PhD, ScD, MD, DrPH, DO, DVM, DNSc, DrPH, etc.)
- Have demonstrated experience and expertise in health science (e.g., medicine, behavioral medicine, nursing, medical anthropology, health economics, public health, health policy).
- Have a feasible D&I research concept to bring to the institute and develop throughout the week. This should be a project the applicant is seriously interested in conducting and/or submitting for funding.
- Federal employees are not eligible with the exception of individuals whose position allows them to receive grants and function as independent researchers (e.g., VA research investigators).
- Be willing and able to pay your own travel expenses (round trip airfare, ground transportation, and some meals) and attend the entire training 5-day institute, if accepted.

Applicants are NOT required to be citizens, permanent residents, or non-citizen nationals of the United States. There is no fee to apply to attend the institute. **However, all applicants are responsible for arranging and paying for their travel to attend.**
